The purpose of this meeting is to provide the community with an opportunity to learn about the proposed project and allow an open discussion of any views and comments concerning the proposed improvements. A Q&A session will immediately follow the presentation.

The purpose of this project is to relocate the line of existing utility poles on the east side of Route 159 in Windsor Locks to the west side of the roadway. This will allow for the realignment of the existing track of the Hartford Line and the installation of a second track to support increased train service. The project also includes relocation of an existing traffic signal mast, curb and sidewalk improvements and roadway safety improvements.

Minimal right-of-way impacts are anticipated in this project.

Construction is expected to start winter 2026, depending on funding, right-of-way acquisition, and permits. The estimated cost is \$5 million, with 100% state funds.

The public can submit comments and questions during two-week public comment period following meeting. Direct comments and questions by Thursday, June 12, 2025, to info@nhhsrail.com or visit <http://www.nhhsrail.com>, and submit under the “Stay Informed” tab.
