Town of Granby Attendees:

Kirk Severance

Public Attendees:

(5) Via Zoom, (0) Via YouTube

Presentation:

A virtual presentation was held through a Zoom Webinar for the project. Mr. Francisco Garcia (CHA) started the meeting with a few words of introductions. The technical presentation was then delivered by Mr. Daniel Claff (Mott MacDonald) and Mr. Francisco Garcia (CHA), who also moderated the Q&A Session.

The presentation began at 6:05 p.m. Following an introduction of the project and the project design team, the following items were presented:

- The purpose and need of the project, which is to address bridge and roadway deficiencies, and improve/maintain major components to a State of Good Repair.
- The project will replace and improve the culvert and road surface, including making the road more accessible for pedestrians and bicyclists.
- Construction will utilize stage construction to facilitate traffic control during construction. Traffic will follow an alternating one-way pattern controlled by a temporary traffic signal.
- The estimated construction cost is \$3,819,911 (80% Federal & 20% State).
- Construction is expected to start Spring 2027 and end early 2028.

Public Comments and Questions:

There were no public comments at the meeting.

The following additional questions were received during the two-week comment period following the virtual public information meeting:

No questions have been received after the virtual public information meeting.

Adjournment: The project was generally well received by those attending the meeting. The live virtual presentation was closed at approximately 6:40 pm.
